BOSTON:

T. R. MARVIN & SON, NUMISMATIC PRINTERS.

1895.

In offering the superb collection of Coins of Ancient Greece and Rome, enumerated in the following pages, the eataloguer does so with some degree of hesitation, because the number of eollectors of this elass of eoins here is supposedly limited, and the interest not generally in keeping with the importance of this braneh of Numismatics. And yet, the encouraging words reeeived by him from several quarters, since the work was undertaken, create the impression that interest in Ancient Coins is rather dormant than wanting, simply because oppor-tunities to purehase genuine or superior specimens at un-reserved public sales are of such rare occurrence.

The opportunity is now at hand and the support of col-lectors in general respectfully solicited. Special attention is invited to the rare and beautiful pieces described under 370, 384, 393, 412, 413, 414, etc., some of which have remarkable Punic inscriptions. Many others might have been com-mented on.

Nothing can elevate the taste of a genuine lover of Numis-matics so much as the study of the gems of ancient art, the admiration and the despair of modern engravers. The time must surely eome when they will reeeive the attention they deserve, and assume their true place as subjects of investiga-tion by Ameriean collectors.

Concerning the faseinating interest and educational value of Ancient Coins a very reeent writer says:

Of all "antiquities" Coins are the smallest, yet their his-toriel range and authority is the widest and highest of all. No history is so unbroken as that which they tell: no geography so complete; no art so continuous in sequence and so broad in extent: no mythology so ample and so various. Greek Coins are the Grammar of Greek Art, and enable us to trace its growth and deeadence: they are also objects of the finest art themselves, small indeed in surface, but beautiful and large in treatment under the skilled engraver's hand. In the Roman Coinage we find a gallery of faithful portraits of illustrious Emperors and leaders of men, and an invaluable inventory, so to speak, of the art that was stored at Rome from the spoils of Greece.
